

FG-SRG CAM ELYAF ÖRGÜLÜ SİLİKON MAKARON 5000 V

DESCRIPTION:

Sleeve made of a type E glass fiber braid, coated with a silicone elastomer.

WORKING TEMPERATURE:

- Class C – 55° C / + 230°C in continuous service
- Can withstand peaks of up to 250° C

ELECTRICAL CHARACTERISTICS:

Standard insulation voltage: 4,0 kV

CHEMICAL CHARACTERISTICS:

Good resistance to most chemical agents.

STANDARD COLOURS:

Brick red (other colours by request)

PHYSICAL CHARACTERISTICS:

- Excellent flexibility
- Good resistance to ageing
- Good resistance to vibrations
- Poor mechanical strength of the silicone elastomer
- Good adhesion of the silicone elastomer to the glass braid
- Does not propagate flames
- Good resistance to humidity
- Fire resistance UL 1441
